

AFTERMARKET SERVICES

OPTIMIZE.
UPGRADE.
EXTEND.

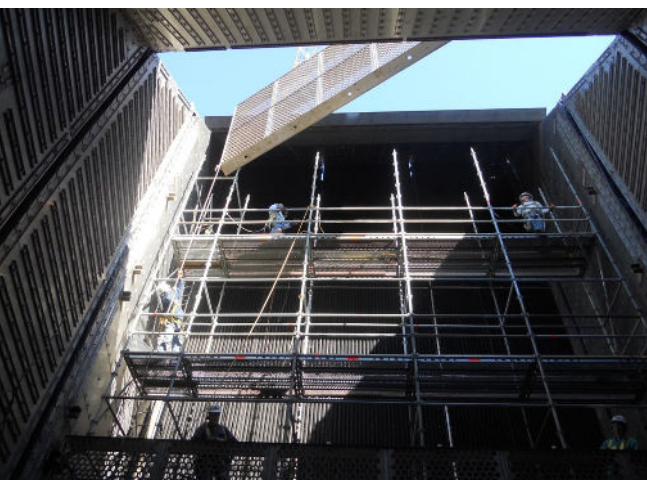

*Complete Aftermarket Solutions for HRSG
Performance, Reliability, and Lifecycle Support*

YOUR GOALS. OUR EXPERTISE. ONE TEAM.

At Nooter Eriksen, we recognize that your HRSG is more than equipment—it's a critical asset in delivering reliable, efficient power. That's why we approach aftermarket support as a partnership. Our team works closely with you to support every stage of your unit's lifecycle—whether you're aiming to restore performance, enhance operational flexibility, or extend service life.

Rooted in OEM expertise, our aftermarket group provides tailored solutions designed around your plant's specific challenges and goals. From field inspections and thermal fatigue evaluations to engineered retrofits and replacement parts, we help you reduce risk, increase efficiency, and stay ahead of evolving performance demands.

Whether you're preparing for a major outage, addressing a critical failure, or proactively investing in future upgrades, we're here as your strategic partner—not just to maintain your system, but to strengthen it for years to come.

EXPERT INSIGHT.

TRUSTED PARTNERSHIP.

TAILORED SUPPORT.

From comprehensive inspections to engineered retrofits, Nooter Eriksen offers a full range of aftermarket services designed to improve reliability, enhance performance, and extend the life of your HRSG. Backed by OEM insight and a collaborative approach, we support every stage of your system's lifecycle with solutions tailored to your plant's unique operational needs.

ASSET INTEGRITY & SYSTEM ASSESSMENTS

Evaluate the long-term health and performance of your unit:
