WYATT

HYDRO DEMOLITION

PREMIER HYDRO DEMOLITION

Hydro Demolition at WYATT utilizes cutting-edge robotic technology to provide precise, efficient, and intrinsically safe demolition solutions. Our fully programmable, remote-controlled equipment ensures heightened safety, reduced job costs, and a smaller operational footprint compared to conventional methods. With continuous R&D and the most advanced robotics on the market, we deliver versatile and specialized demolition services tailored to meet evolving industry needs.

HEIGHTENED SAFETY

- ✓ No respirable crystalline silica in the work area
- ✓ Decreased hand and back injuries due to a fully automated process (chipping is the leading cause of these injuries in our industry)
- ✓ Reduced worker fatigue
- ✓ Significantly quieter than traditional removal, reducing the risk of hearing damage
- ✓ Operators are fully trained and qualified

MATERIAL REMOVAL CAPABILITIES

- ✓ Refractories
- ✓ Concrete
- ✓ Fireproofing
- ✓ External coatings
- ✓ Brick
- ✓ Sulphur
- ✓ Polymers
- ✓ Epoxy
- ✓ Coke

REDUCED JOB COSTS

WYATT's Hydro Demolition technology significantly reduces labor costs and operates up to 15 times faster than traditional pneumatic methods, delivering fully cleaned surfaces with no shell damage or microfractures. Our system uses over 200% less water than competitors, minimizes damage to anchor systems, and maintains high productivity with lower working pressure.
